

MANAGEMENT OF GERMAN LANGUAGE PROBLEMS THROUGH THE HOT POTATOES APPLICATION: WORKSHOP FOR TEACHERS GERMAN LANGUAGE IN CENTRAL JAVA

by Dr. Wening Sahayu, M.Pd., Dr. Sulis Triyono, M.Pd., Dra. Lia Malia, M.Pd., dan Dra. Tri Kartika Handayani, M.Pd.

ABSTRACT

The purpose of this community service activity is to provide knowledge, experience and skills to use learning media through the application of hot potatoes. This is so that the teachers in making German questions in schools are motivated and get convenience because this application has many variations.

This PKM activity is carried out through training that lasts for 16 hours. The training materials included (1) giving knowledge about the application of hot potatoes, (2) the practice of applying hot potatoes for making questions in German, (3) giving guidance online and assigning questions in German through the hot potatoes application.

The activity was carried out in three sessions. The first session was filled with material giving about the application of hot potatoes. It is expected that through this activity the teachers can have knowledge about the application of hot potatoes and can apply them in making German practice questions. The second session contained material on the application of the application of hot potatoes in making German practice questions. The program that is practiced is making questions through (1) JQuiz, (2) JCross, (3) JMix and (4) JMatch. The training participants were divided into 4 groups, and each group practiced making a question with one of the hot potatoes application sections as mentioned above. The third session was a presentation of the results of each group regarding the steps and results of making German practice questions using JQuiz, JCross, JMix and JMatch. After the question and answer session was held, so that each group had the same knowledge about the use of this hot potatoes application. Furthermore, guidance on making questions in German to the teachers was carried out through the online method.

The output target in this PkM is in the form of scientific articles which will be published in an international seminar in 2018 at UNY.
