

SURVEY OF LOCAL CARE LEARNING IN THE KINDERGARTEN IN SPECIAL REGION OF YOGYAKARTA

by Joko Pamungkas, Amir Syamsudin, Harun R. Sudaryanti

ABSTRACT

ABSTRACT

The purpose of this study was to describe the implementation of learning local wisdom in kindergarten in the province of DIY. The research method used is a survey. The results showed that the wealth of local wisdom has not been used optimally for the process of stimulating early childhood development. The skills in processing flavors such as carving, playing gamelan and tambourines performed by children almost do not occur in the implementation of early childhood learning. However, the feeling of painting skills get the best portion in early childhood learning in all districts / cities in Yogyakarta. Similarly, the introduction of designations for core family members, large families, types of work, traditional games, traditional ceremonies, the introduction of names of animals, plants, and time markers have been carried out well in the process of early childhood learning.

Kata Kunci: Keywords: local wisdom, learning, early childhood
