ABSTRACT

Financial reporting is an important matter for the Gamping Sleman Grand Mosque Foundation in order to account for the funds obtained from the people for the benefit of the people. However, the management realizes that there are still weaknesses because this foundation does not yet have adequate financial reporting management and auditing of financial statements. In order to improve the financial reporting management of the foundation and the audit of the foundation's financial statements, the management developed a collaboration with the Department of Accounting Education, Faculty of Economics, UNY. This collaboration concerns aspects of training and assistance in financial reporting and financial audit management which will begin in 23 February 2022. The training will be held in a blended manner due to the pandemic period, while training materials on financial reporting management and financial statement auditing will be prepared by a service team for the Accounting Education Department of the Faculty of Economics. UNY. The service team assisted by students will periodically and scheduled provide assistance after training until the foundation management is able to carry out financial reporting management and audit financial reports independently. This training and assistance is expected to be able to increase the independence of the board in managing financial data and produce financial information in a transparent, objective, accurate, auditable, and useful manner for its users.
