

TRAINING FOR IMPROVEMENT OF ACTIVE LEARNING SKILLS IN PRIMARY SCHOOL TEACHERS OF SLEMAN YOGYAKARTA REGENCY, 2020

by Agung Hastomo, Bambang Saptono, Sigit Dwi Kusrahmadi, Fery Muhamad Firdaus, Amalia Rizki Ardiansyah

ABSTRACT

Community service activities aim to improve teacher understanding and skills in planning active learning to increase student understanding of the subject matter presented. Active learning allows students to acquire their own knowledge through various activities designed by the teacher.

The method of activity is through interactive lectures with media zoom. The material presented is the concept of active learning "thinking", theoretical and practical basis for active learning, implementation of active learning "thinking" in mathematics, ips, pkn and thematic subjects. Evaluation of training activities using the material understanding instrument provided at the end of the training activity.

The results of the training show that the teacher's understanding of active learning "thinking" is relatively good with a score of 71 in the high category. The obstacle to the activity is that they have to use online media (zoom) so that there are obstacles when direct visual explanation of the material is needed.
