

PENINGKATAN WAWASAN GURU TK TENTANG TEORI PENDIDIKAN NATURALIS DAN IMPLEMENTASINYA UNTUK MENGANTISIPASI DAMPAK COVID 19

by Dr. Dra. Lusila Andriani Purwastuti, M.Hum

ABSTRACT

The purpose of this service is for the teacher's insight into the Naturalist theory which then provides implementation in learning. Naturalist theory contains a lot about the natural environment in which the child is born to then there is interaction between the child and their environment. In addition, naturalist theory severely limits the excessive and academically unjustified limitations of the learning environment on nature. This study was followed by 58 teachers. The training mechanism carried out is to provide insight into naturalist theory, then followed by its application in learning including training on making RPPH, media, and songs based on Naturalist theory.

The results of the service: the teacher produces several lesson plans that include children's freedom in choosing learning as well as several songs whose lyrics contain the principles of naturalist theory. Likewise, several learning media in the form of powerpoints in which there are also natural principles, namely discussing plants, animals, and the environment.

Kata Kunci: naturalist theory, learning, early childhood
