

SCHOOL-BASED MANAGEMENT DEVELOPMENT AT SMK NEGERI 1 SAPTOSARI, GUNUNG KIDUL, YOGYAKARTA

by Kir Haryana, Amir Fatah, Yoga Guntur Sampurno

ABSTRACT

The community service program at SMK N 1 Saptosari aims to help schools understand and apply school-based management concepts related to schools with the status of Regional Business Service Entities and Central Vocational High Schools of Excellence.

This community service at SMK N 1 Saptosari was carried out by providing explanations to participants about the definition, objectives and principles of SBM in Vocational High Schools. Furthermore, in order to strengthen the curriculum formulation of the Central Vocational High School of Excellence, the implementation of the Central Vocational School Curriculum development training provides explanations to the Principal, Deputy Principal, and all teachers to develop the curriculum expected by the Government. Project-based training will also be carried out to explain how the learning model should be implemented by teachers and students.

The result of this community service program is an increase in the knowledge of the training participants about school-based management, curriculum formulation at the SMK Center for Excellence and project-based learning. The implementation of SBM, the formulation of the correct curriculum in SMK PK and the implementation of project-based learning are the hopes of the community service Team after improving school knowledge.

Kata Kunci: school-based management, curriculum development, project-based learning
