

## **TRAINING CHILDREN WITH SPECIAL NEEDS**

**by Supriyanto, Lismadiana, Nur Indah Pangastuti**

### **ABSTRACT**

The purpose of this training is to increase in science and technology insight for teachers/cadre of early childhood in children with special needs/ABK and can do approach to science and technology in the learning process for children with special needs. PPM program training children with special needs was held on 13-14 September 2014 in the village hall Dodean Yogyakarta, attended by 72 participants. The method used in this devotion is a lecture and demonstrations to explain the material that will be given is about: 1) Children with special needs (ABK); (2) The efforts of parents and teachers in increasing confidence of children with special needs through sports and (3) Guidance and counseling for children with special needs. PPM training program with children with special needs is a sense very important for KBTK /SPS TPA incorporated in HIMPAUDI Godean Yogyakarta. The material presented is very beneficial, especially things that are practical in the handling of cases in the learning and development of children with special needs
