Community service activities aims to 1) Socializing the meaning and function of ethics in every development innovation, especially in the field of Educational Technology 2) Establishment of a membership database, the formation of the board and work program IPTPI DIY branch.

PPM activities carried out in the form of seminars and congresses. The methods used in this activity are: lectures, discussion, and input data. The material presented in this activity include: basic concepts of professional ethics, the application of ethics to innovate in learning both the micro and macro educational innovation.

PPM's activities received a positive response from teachers, alumni of TP, TP PPS S2 UNY students, as well as representatives of civil functional Learning Technology in Regional Development Prodinsi DIY. It is characterized by the number of participants who have met the target and enthusiastically participated in the activities of PPM until the end even hoping that if this kind of activity can be repeated. The results of the assessment both increased ability of participants and activities of the assessment process met the criteria and indicators that have been set.
