ABSTRACT

Currently, teachers are still experiencing difficulties in developing an IPS-based learning model of a scientific approach, especially in formulating student worksheets based on local wisdom values. Community service is aimed at; improve the ability of IPS MGMP teachers in Kebumen in developing IPS learning model with scientific approach (scientific approach) based on local wisdom using student worksheet.

Devotion is carried out with workshop strategy, in which the strengthening of the material, the practice of compiling the teaching materials in groups, and preparing the teaching materials individually. The event was attended by 50 IPS teachers in Kebumen District, which was conducted through two face-to-face and one-time structured tasks.

Efforts to improve the ability of IPS MGMP teachers in Kebumen in developing IPS learning model with scientific approach (scientific approach) based on local wisdom using student worksheet. dilakukan with workshop technique and individual assignment. From the results of the activity evaluation, the teachers showed the progress of the ability in preparing the teaching materials, as evidenced from the tasks that were compared with the pretest before the activity. Based on interviews to the participants, also obtained data that this activity is very useful and need to be followed up with other activities, especially in developing teaching materials based on information and communication technology.
