ABSTRACT

Implementing Merdeka curriculum that can facilitate students' diverse abilities requires teachers to develop differentiated learning. Teachers' readiness to create learning modules based on differentiated instructions must be improved, especially at SMP 4 Pakem, which has entered the Mandiri Sharing category. Schools must implement the Merdeka Curriculum by developing their teaching tools. Thus, a workshop was held, which was attended by eight mathematics teachers in preparing teaching modules based on differentiated instructions.

Kata Kunci: *Teaching modules, Differentiated Instructions*
