by Miftahuddin

ABSTRACT

Al-Irsyad Purwokerto is part of the regional management branch in Central Java. *Al-Irsyad's* own education, one of which is *SMP-SMA* (Junior High School and High School) *Boarding School Al-Irsyad*, is under the authority of the Education and Teaching Lajnah (*Lajnah Pendidikan dan Pengajaran*) whose management is carried out by the Foundation of *Al-Irsyad Al-Islamiyah Purwokerto*. It is known that since the 1990s there have been internal conflicts, and at the peak in 2007 two *Al-Irsyad* organizations emerged. For this reason, the purpose of this study is first, to find out the influence of the conflict on *Al-Irsyad Purwokerto*. Secondly, knowing the education system in *SMP-SMA Boarding School Al-Irsyad Purwokerto*. Third, knowing the planting of the character of Islam in *SMP-SMA Boarding School Al-Irsyad*.

The research method used is qualitative research. The steps taken are, first, the determination of the object of research, namely in the form of systems and educational processes that are carried out in *SMP-SMA Boarding School Al-Irsyad Purwokerto*. Second, data collection is done by tracing documents to find a number of data plus data from interviews with *Al-Irsyad* administrators and teachers. Third, after the data is obtained from several available sources, an analysis of the data that has been collected, classified, searched for relationships, and then concluded based on the arguments of theoretical logic and construction.

The results of the study showed that the conflict between the central management of *Al-Irsyad Al-Islamiyah* which ended in 2007 and led to the new *Al-Irsyad* organization, *Perhimpunan Al-Irsyad*, was not influential for the *Al-Irsyad* of *Purwokerto* branch, both organizationally and educationally. Furthermore, even the *Al-Irsyad* of *Purwokerto* branch was able to develop the field of education with the establishment of *SMP-SMA Al-Irsyad Boarding School*. Meanwhile, the education system of *SMP-SMA Al-Irsyad Al-Islamiyah Boarding School Purwokerto* is like modern pesantren education in general. Boarding School is a school with a boarding system, in which students and also teachers and education managers live in dormitories that are in one environment. This kind of system is of course more profitable for the conducive teaching-learning process, because students are directly in the guidance, and supervision of the teacher. Then, the character of Islam that is to be achieved in the education process of *SMP-SMA Al-Irsyad Boarding School* is a character that is based on the values contained in the *Al-Qur'an* and *Hadith*. However, in this context, the teaching is more textual than contextual. In real terms this can be seen in the syllabus contained in the teachings of Islamic purification. This textual vision of the *Qur'an* and *Hadith* can sometimes reduce and clash with Indonesian values.
