

# TRAINING ON IMPROVEMENT OF PLANT REPRODUCTION TEACHING ACTIVITIES FOR HIGH SCHOOL TEACHERS

by Budiwati, Ratnawati, Suhartini

## ABSTRACT

The purpose of this community service program activity is to 1)enrich the experience of teachers in recognizing some of the phenomena on the reproduction of plants, 2)provide skills for teachers in drafting activities of plant reproduction laboratory course which is simple and canbe easy to learn by students.

This community service activities attended by 19 Biology teachers from some high schools around Sleman, Yogyakarta. The training is carried out by conducting tutorial, workshop, and assignments, with the assistance of 3 lecturers and 2 students. Tutorial and workshop activities was done in the laboratory of the Department of Biology Education FMIPA, UNY, while the assignment was carried out in the participants' home schools for 1 week.The assignment was composing the draft of plant reproduction lab course activities for high school based on the knowledge and skills acquired during the training. The results from the draft submitted show that the training activities was quite successful. Through these activities teachers can design activities of plant reproduction based on the practical experience gained during the training.
