

PHBS EDUCATION (CLEAN AND HEALTHY LIFESTYLE BEHAVIORS) POST HEALTH DISASTER COVID-19 COMMUNITY CONDONGCATUR VILLAGE, SLEMAN YOGYAKARTA

by Drs. M. Nur Rokhman, M.Pd.

ABSTRACT

This training aims to provide awareness through PHBS Education (Clean and Healthy Behavior) Post-Covid-19 Health Disaster for the Condongcatur Village Community, Sleman Yogyakarta. The training method applies direct training and indirect training, namely conventional meetings at the Village Hall and indirect meetings through PHBS administrators through Youtube channels and distribution of masks to the community. The results of this dedication show that training and education for the community which is focused on the people of Dusun Joho, Desa Condongcatur was attended by 35 people who were quite enthusiastic in participating. The public is aware of the importance of a healthy lifestyle amid the Covid-19 pandemic that is currently hitting. To avoid this virus, it is necessary to have a clean and healthy lifestyle that is carried out continuously and is a necessity for every citizen to strictly adhere to Health protocols.
