

The Readiness Biology Education student in math and science faculty on practice study in school

by Sukarni Hidayati, Yuni Wibowo, Atik Kurniawati, Rio Christy Handziko

ABSTRACT

This study aims to determine the readiness of students of biology education study program in force in 2013 to carry out the terms of the fourth PPL educational competencies: 1) personal competence, 2) pedagogical, 3) professional competence, and 4) social competence. This study is a descriptive study to describe the condition of 4 competence of teachers to students in class of 2013 that will implement the PPL in the academic year 2016. The method in this research is using survey-census. Population and sample in this study were all students of biology education 6 semester study program (in force 2013) which currently take a course in micro teaching practice. Instrument on the study include tests of academic ability (professional competence) and pedagogical, social competence questionnaire sheet and personality. The data were analyzed descriptively by looking at test scores of academic and pedagogical abilities as well as the percentage of social competence and personality. The results showed that the students of Biology Education Prodi Force in 2013 has had a good readiness for implementing PPL views of professional competence / academic, pedagogical competence, personal competence / personal and social competence.
