

Effective, Efficient, and Fun Learning Using Learning Media for Elementary School Teachers in the Bulu Sukoharjo Education Coordinator Area

by Sungkono, Mulyo Prabowo, Novi Trilisiana, Mukhammad Luqman Hakim

ABSTRACT

The community service program (PPM) is a workshop on preparing effective and enjoyable learning using learning media at SDN Malangan 3 Bulu Sukoharjo. PPM activities aim to increase teachers' knowledge and skills in implementing effective, efficient, and enjoyable learning models accompanied by learning media. There were 100 participants in PPM activities consisting of elementary school teachers in Bulu District, Sukoharjo Regency. The PPM activity method uses the Blended Learning method, carried out classically and online using Google Classroom. PPM activities are classically carried out by explaining material about effective and efficient learning using learning media, providing examples of learning media, structured discussions, and practicing developing effective, efficient, and enjoyable learning plans. The results of PPM activities are that teachers understand effective and efficient learning designs and products in the form of teaching modules that contain learning media.
