## **ABSTRACT**

The purpose of this training activity is to provide knowledge and skills to make ecoprints as an effort to develop themselves in the fashion field. The target activity is students of class XI Diponegoro Vocational School Depok Sleman. The method used in this training activity is a lecture to convey the ecoprint theory, a demonstration method to provide an example of the process of making ecoprint, and the practice of making ecoprints to finished products conducted by participants accompanied by a team of devotees. Participants practice laying leaves, rolling and tying and steaming ecoprint cloth. After the results of the ecoprint are finished, the participants turn the fabric into functional objects that are ready to sell. The results of the activity: (1) The implementation of the training activities made an ecoprint 3 times, which was attended by 20 students and 4 teachers (2) Students were able to make an ecoprint well according to the steps in the jobsheet. Based on the evaluation of the attendance process during the training 100% are met. While based on the results of student practice 85% of the participants were able to make ecoprints well and were able to make 1 product from 2 planned objects in the form of: pencil case, pouch, and mukena bag.
