

# **Learning disaster preparedness training for early childhood teachers full day se DIY**

**by Puji Yanti Fauziah**

## **ABSTRACT**

DIY has a long history associated with the earthquake , both volcanic and tectonic earthquakes . Preparing for disasters in units of early childhood to prevent casualties , the necessary preparation so that the full day early childhood teachers can act quickly and precisely . Early childhood children are still very dependent on adults need oembiasaan and training in the face of the earthquake disaster in order not to panic . In this case the teacher's role becomes very important because early childhood teachers accompanying the children all day , it was organized disaster preparedness training in early childhood education units . Disaster preparedness training in early childhood full day consists of two stages of the first to provide knowledge and understanding ( first year ) , both of provision of direct simulation in institutions ( second year ) . In this training more lecture approach , simulation and FGD .

The training was attended by 30 participants from all over the district , namely the city , Sleman , Bantul , Gunung Kidul and Kulon Progo . Resource persons in the training consisted of Dr. Siti Irine Dwiningrum , Dr. Praise yanti Fauziah and Widyaningsih , M.Sc. Hopefully after this training the teachers can mentransferkannya PAUDI full day on which the other teachers in each institution
