ABSTRACT

Football is a sport that has become a hobby of all people. Regardless of whether you are rich or poor, young or old, even now football is also played by women. Football is a team game that requires basic cooperation between team members, as one of the characteristics of the game of football. In order to be able to play soccer properly and correctly, the players master the basic techniques of soccer. To play soccer well, players are equipped with good basic techniques, players who have good basic techniques tend to be able to play soccer well too. Football is currently very complex and has entered the industrial era 4.0. Nowadays, football is one of the most interesting issues to study because football has become a necessity and part of society, especially in Indonesia. Apart from being a game, football is expected to be able to produce achievements. In achieving the achievement is certainly not as easy as turning the palm of the hand. Continuous practice is needed. Achievement cannot be juxtaposed with quantity, but must be juxtaposed with quality.

One of the assets owned by Gumblegan Village with potential that can be explored is the Village Football Field. This field is located to the west of the village hall office with very easy access either by motorbike or car. The field, which has been used only during inter-village tournament events (tarkam) has been widely known by local residents and even outside the area. This can not be separated from the field conditions that are known to be quite good, such as grass, standard field sizes, goal conditions, etc. As one of the potential village assets, the use of the field as an effort to increase Village Original Income is very feasible. This is supported by many local residents who like to play football.

The small thing that becomes an obstacle to the formation of a Football School in Gumblegan Village is that there is no budget allocated for the formation of a Football School. The condition of the Covid-19 pandemic which is also one of the frightening specters because it absorbs so much of the available budget. This causes the paralysis of village programs that should be realized, to be hampered. Based on the facts that have been conveyed, it is very important to establish a Football School under the BumDesa of Gumblegan Village to be able to increase Village Original Income. With the presence of the Football School, it is hoped that it will be able to increase Village Original Income so that the purpose of the Village Law to make villages independent can be achieved.
