

Managerial Training for Community Reading Parks (TBM) and Community Learning Activities Centers (PKBM) in improving institutional quality and literacy program services for Early Childhood

by Puji Yanti Fauziah, yoyon suryono, Sugito

ABSTRACT

The Education System in Indonesia is divided into three lines, namely formal, non-formal and informal. Community Learning Activity Center (PKBM), community reading park (TBM), Smart house, Omah Pasinaon, course institutions are one of the many non-formal non-formal education services that have been developed to support education in the school line. The large number of TBM and PKBM must be appreciated and supported because it provides a large contribution to educating children. PKBM and TBM are in the middle of the community, making it easier for the community, especially children, to learn. But the obstacle is that many managers of TBM, PKBM or smart homes do not have a background to the PLSan so the management is not optimal, both in terms of managerial and program content. Through PPM, more modern Managerial TBM and PKBM training can stimulate and encourage children to come to TBM and PKBM.
