ABSTRACT

The world of education continues to develop along with the times, both in the form of curriculum adjustments, updated learning methods, and the preparation of new study programs. Legislation for Regional Autonomy policies which also have an impact on the education sector. Education management, which was originally centralized, has gradually developed into a decentralized nature. Decentralization provides the opportunity for regions to formulate policies based on their characteristics. This requires policy analysis competence to formulate policy alternatives based on local wisdom. A policy analyst is able to examine policy options with precision based on needs and data or is known as evidence based policy. This policy process approach is able to create various policy innovations in the region, as well as becoming a comparative advantage that differentiates itself from other regions.

The Brebes Regency youth education and sports office is one of the districts that has the responsibility to create education policies that are based on local wisdom and innovative policies. However, in reality there are still very few human resources who understand how to carry out education policy analysis and the stages in making education policies. Therefore, Education Policy Analysis Training for Education Stakeholders in Brebes Regency is important to carry out. The target output in this training is the ability of stakeholders to make recommendations using policy briefs.

PkM with the title "Education Policy Analysis Training for Education Stakeholders in Brebes Regency" has gone smoothly according to plan. The target audience gave a positive response marked by enthusiasm during the event and direct responses from participants stating the usefulness of this training.
