ABSTRACT

The implementation of group guidance services by applying several innovative guidance techniques in the field has not been carried out properly, especially during the COVID-19 pandemic, which is full of limited space. The techniques commonly used by guidance and counseling teachers generally use discussion techniques, there have been no innovations in other innovative guidance techniques when applied in the field, especially in the online learning period as it is today. The purpose of this activity is that participants are expected to have an understanding of the importance of applying various guidance techniques in an innovative and appropriate manner in the implementation of group guidance services so that group members (students) are more attractive and feel the benefits according to the expected goals and in accordance with current conditions that require the implementation of services in a comprehensive manner. online (online). PPM activities use the digital zoom platform as a medium and carry material on virtual-based group guidance with a specific theme on game techniques in network-based (virtual) group guidance. The target audience is junior high school teachers in the Special Region of Yogyakarta. The implementation of Community Service is carried out for 3 days using zoom uny.
