

# TRAINING AND ASSISTANCE IN THE DEVELOPMENT OF SAFE EXAM BROWSER (SEB) FEATURES OF BAPELKES E-LEARNING SYSTEM (BEST) AT HEALTH TRAINING CENTER DIY

by Dr.phil Rahmatul Irfan, MT

## ABSTRACT

The corona virus outbreak has been declared a pandemic by the World Health Organization (WHO). A pandemic refers to a disease that spreads to many people in several countries at the same time. The number of the spread of the corona virus itself has increased significantly and is sustainable globally (<https://nationalgeographic.grid.id>). The term pandemic is not used to indicate the severity of a disease, but only the level of its spread. In the current case, COVID-19 is the first pandemic caused by a coronavirus. Learning from home has changed the paradigm of physical face-to-face to non-physical face-to-face. Non-physical face-to-face has the meaning of distance learning. To facilitate this is only done through Information Technology (IT) or learning through IT. Learning uses IT facilities, according to Smaldino et.al. (2015) called learning using Web 2.0 and social media, where teachers and students can interact.

The method of this activity is in the form of training for training personnel in BAPELKES DIY. After being given training, the personnel were then asked to apply the results of the training to be delivered to the training participants according to the online platform owned by BAPELKES DIY, namely the Bapelkes E-learning System (BEST).

This activity is completely carried out offline using a strict health protocol. Methods of activities carried out are: a. Lecture. Explanation and motivating teachers to be more planned in carrying out online learning development activities by taking into account the conditions of the school, teachers and students. b. Tutorials and practices at BEST. Tutorials and practice focus on the ability to: (1) make presentations; (2) voice over each slide; (3) convert to various digital formats; and (4) how to present the results. c. Evaluation practice by the instructor to the trainees using the Safe Exam Browser (SEB) feature
