

SCIENTIFIC WRITING TRAINING WORKS FOR TEACHERS BRANCH ELEMENTARY SCHOOL IN THE DEPARTMENT OF EDUCATION DISTRICT DISTRICT BANGUNTAPAN BANTUL

by Dr. Aman, M.Pd.

ABSTRACT

As a professional educator, teachers are required not only carry out the task of educating and teaching, but also had to develop the profession. One evidence of the ability to develop the profession is able to write scientific papers. But the facts show that teachers, particularly primary school teachers, still much less capable of writing the paper ilmiah. Tujuan PPM activity is to improve teachers' understanding and skills in writing scientific papers. To achieve these objectives, the method used in this activity is the training of elementary school teachers in the District Education Office environment Banguntapan, Bantul. The training activities begins with the provision of material to increase motivation and understanding of teachers about writing scientific papers. After giving the material, teachers write scientific papers while guided, by example, and given feedback. Implementation of the Environmental Training UPTD held in early childhood and the District Primary Education Banguntapan for 3 days on 26, 27 and September 28, 2013 at 07.30- 16.30. In general, all participants followed the events with high motivation and earnest. This is evident in their presence on a regular basis for three days and following each session with full attention and enthusiasm. The questions they launched during the opening of the session. Things are less clear they ask to obtain understanding. The first day of training, participants follow carefully. They feel a new knowledge that had not they know the participants better understand the concepts and aspects of scientific papers and in a standardized way of writing. This is evidenced by the results of scientific work that they carry on
