

PROFILE OF PARENTS OF KINDERGARTEN STUDENTS IN YOGYAKARTA CITY

by Dr. Cepi Safruddin Abdul Jabar, Tina Rahmawati, M.Pd Muh. Ferry, Asri Nur Azizah, Whana Yanuarti

ABSTRACT

The study aims to describe the profile of kindergarten students' parents in the city of Yogyakarta. This research is a descriptive research type. This research was conducted in the city of Yogyakarta, while the unit of analysis was all kindergartens in the administrative area of the city of Yogyakarta, which were 218 kindergartens. The technique used to collect research data is a questionnaire. Data to be extracted includes the profile of education, welfare, and parents' expectations about the school. The data obtained will be analyzed using descriptive analysis techniques and look for differences in the proportion of data using non-parametric comparative test analysis with the type of chi square.
