

TPACK IMPLEMENTATION TRAINING IN HYBRID LEARNING IN THE NEW NORMAL ERA FOR UPSI MALAYSIA LECTURERS

by Prof. Dr. Paidi, M.Si; Drs. Suratsih, M.Si; Dr. Anggi Tias Pratama, S.Pd., M.Pd; Rizqa Devi Anazifa, M.Pd

ABSTRACT

The purpose of the PPM activity between UNY and UPSI is to improve the ability of UPSI lecturers to apply the TPACK principle in biology learning and to improve the ability of UPSI lecturers to apply the principle of inquiry-based blended learning in biology learning. This PPM consists of a series of activities consisting of brainstorming, discussion, and question and answer, simulation or demonstration, peer-teaching, and lesson study. Covid-19 as well as the new normal post-pandemic era, increasing the competence of prospective biology teacher students, which is very much needed in the 21st century, and in particular improving the quality of collaboration in learning, research, and publications between the Biology Education Study Program, FMIPA UNY and the UPSI Biology Education Study Program.
