Primary Teacher Education
Yogyakarta State University

The learning system currently used in the Covid-19 pandemic era uses online learning models, where the learning process must use an internet network which is commonly called Online Learning Models (OLM). In this learning system change, it is hoped that it can create learning that is more creative, participative, diverse, and comprehensive. There are several platforms that can be used to carry out online learning, for example WhatsApp, telegram, Facebook, Google classroom, Google meeting, Zoom cloud in, Canvas, Moodle, and others. Therefore, as a teacher, expertise is needed in utilizing these platforms to support online learning (in the network). The objectives of online learning training in facing the challenges of the 21st century for elementary school teachers in Yogyakarta are: (1) understanding the concept of online learning that is suitable for learning in the 21st century, (2) compiling content and applying online learning to teach. The method of this PPM activity is to use the methods: (1) with lectures and questions and answers, (2) demonstrations and tutorials, and (3) practice. This training activity is carried out in 2 meetings, namely 2 (two) meetings and 1 (one) mentoring. The results of the PPM activities which were carried out on July 4, 2020 with the theme of preparing learning designs in elementary schools with a focus on training on the stages of making online learning platforms and utilizing the features found in google classroom. After the training and mentoring is complete, the teacher produces a product in the form of a Learning Implementation Plan (RPP) for online learning.
