# IMPROVING THE ABILITY OF "PAMONG BELAJAR" IN THE RESEARCH AND DEVELOPMENT OF THE PAUD AND DIKMAS MODEL

by Dr. Iis Prasetyo, MM., Drs. Robertus Belarminus Suharta, M.Pd., Prof. Dr. Yoyon Suryono, MS., Dr. Dra. Serafin Wisni Septiarti, M.Si., Lutfi Wibawa, S.Pd., M.Pd.

## ABSTRACT

The aim of the training activity is "improving the tutelage's ability in research and development of PAUD and Dikmas models", especially in research methodology, SWOT analysis in model development, model trial mechanisms, and model effectiveness analysis.

PPM activities are carried out through online training which was held in October 2020. The training is carried out in four meetings which are interspersed with mentoring activities according to the material that has been taught.

The results of the training have shown that the learning Pamong has understood what methods can be used in preliminary research, and has been able to implement them in model development. The learning tutors have used SWOT analysis as a strategic planning analysis in producing problem solving models. Pamong Belajar has been able to produce conceptual models and operational models in the design development models they produce. Pamong Belajar has produced a validated conceptual model that is ready to be tested. Pamong learns to understand various kinds of data analysis techniques and has been able to implement them in the development models they produce.
