

TRAINING IN INDONESIAN LANGUAGE LEARNING MEDIA BASED ON QUIZZZ FOR JUNIOR HIGH SCHOOL TEACHERS IN SLEMAN DISTRICT, YOGYAKARTA

by Maman Suryaman, Anis Mashlihatin, Ilfat Isroi Nirwani, Wijang Iswara Mukti

ABSTRACT

Information technology-based learning is an important part of the learning process, especially during the pandemic. Teachers are required to be able to provide fun learning so that students are interested and happy to follow the learning process. This service activity is focused on training using Quizizz-based learning media to train junior high school teachers in Sleman Regency in Indonesian subjects. Quizizz was chosen among other learning media because it is considered the most able to accommodate learning needs. The training was conducted online through the Zoom Meeting platform to provide material on: 1) the importance of Quizizz-based Indonesian language learning media, 2) Quizizz account creation guidelines, 3) the use of Quizizz for learning; 4) preparation of learning evaluation with Quizizz; structured task presentations; and evaluation. A total of 20 participants registered for this training and 15 participants attended the training. The 15 participants came from 10 different schools. This training resulted in 19 quiz packages and Indonesian language materials. The response of the participants to this training activity was quite good. The participants stated that the training provided was very useful for the learning process in the classroom. Students feel more enthusiastic in learning using Quizizz.
