

FOSTERING CHILDREN'S CREATIVITY THROUGH RHYTHMIC ACTIVITIES IN ELEMENTARY SCHOOL

by Erwin Setyo Kriswanto, Ranintya Meikahani, Riky Dwihandaka

ABSTRACT

This Community Service activity aims to provide a description of knowledge related to solving problems faced by physical education teachers related to rhythmic activity obstacles by providing assistance, so that rhythmic activity learning can foster children's creativity. Activities were carried out in May and July at SD N 4 Wates offline with 30 students. The results of the PkM activities carried out show that PJOK teachers and students are interested in the application of rhyming movements (GIMASIA activities) in growing children's creativity.

Kata Kunci: *Creativity, rhythmic activity, elementary school*
