

Pelatihan dan Praktik Penulisan Karya Ilmiah Guru Sejarah SMP di Kabupaten Bantul : Upaya Peningkatan Kemampuan Meneliti dan Menulis

by Danar Widiyanta, M.Hum. Miftahudin, M. Hum. Ririn Darini, M.Hum.

ABSTRACT

Research and write scientific papers is the part that can not be separated if the teacher wants to have a good competence. However, when this kind of activity was observed infrequently done by the teacher. This is made possible on the one hand due to the lack of budget allocation of research funding provided for teachers, and on the other hand, routine teaching activities and the completion of tasks administratif that must be met teachers, so as to inhibit the creativity of teachers in the field of scientific writing. Proved increasingly rare publication of scientific papers, in the form of books and scientific journals conducted by the teachers. For that, there are several objectives of this PPM, first, providing a concept and depth of knowledge related to the development of research and writing to write scientific papers. Second, provide encouragement, invitations, encourage, and show the way how the skills development of research and scientific works owned by a history teacher. Third, facilitate the delivery of journal articles scientific papers, both the research and development of ideas and thoughts.
