

PELATIHAN MITIGASI BENCANA BAGI WARGA DESA KALIBENING, KECAMATAN DUKUN, KABUPATEN MAGELANG UNTUK ANTISIPASI BENCANA ALAM GUNUNG MERAPI

by Darmono, et al.

ABSTRACT

Abstract

Based on the results of the study, it is known that the northern slopes in the Dukun Subdistrict, especially Kalibening Village, have potential resources and eruption hazards that need to be well recognized by the community, especially the younger generation and the community through identification and mapping of hazards. The PPM activities aim to: (1) Improve the skills of the youth group and the Kalibening Village community in identifying the types of volcanic hazards of Mount Merapi and the surrounding environment, (2) Improve the skills of the youth and community groups of Kalibening Village in mapping the volcanic hazards of Mount Merapi.

The training uses practical methods that are intended so that in a limited and short time the trainees can master the material and basic skills, especially skills in mapping the volcanic potential hazards of Mount Merapi and its prevention and security techniques. The target audience in this service activity is the youth group and the Kalibening Village community in Dukun Subdistrict, Magelang. Training participants, especially youth members and community members who are actively involved in every disaster management at the hamlet, village and sub-district levels. The number of trainees was 30 people. The location of the training was at the Kator Kalibening Village and carried out a visit and field practice in Kawawan Camping Ground and Out bond of Kalibening Village located in Gendungan Hamlet.

The results of the PPM program training were as follows: (1) there was a positive and active response from the trainees who appeared to be enthusiastic during the training activities. (2) The success of the training is indicated by the participants' ability to make an evacuation route map which is the basic skill for the trainees in overcoming the eruption disaster of Mount Merapi. (3) Determine gathering points in the Kalibeing Village Area and socialize to members of the local community. (4) The practice of mobilizing the community affected by the eruption of Mount Merapi.
