## **ABSTRACT**

This thematic PPM activity aims to provide guidance, knowledge and understanding to PJOK teachers at the junior high school level in the Kulon Progo Regency, Yogyakarta about the ethics of writing and publishing scientific papers with the theme of physical education, sports and health.

The method used in the thematic PPM service activities is designed in the form of seminars and workshops as well as practical simulations of making scientific works/articles/manuscripts that will be published in local, national or international journals or proceedings. The implementation of this thematic PPM activity is carried out online (on the network/online) through the Zoom Meeting, Google Meet or Google Classroom applications. Feedback is done by conducting documentation, unstructured interviews and final product invoices in the form of drafts of scientific writing articles/manuscripts. The success in this thematic PPM service activity is determined by the number of target participants/target audiences participating and the final amount of the participant's bill for the thematic PPM activity that goes to the desk of the organizing committee for this thematic PPM activity. This thematic PPM service activity will be supported by physical evidence such as link addresses and participant attendance lists, photos of activity documentation, final product billing soft files in the form of draft articles/manuscripts of scientific papers from participants that are submitted to the committee and others. The target audience who attended this activity amounted to approximately 60 PJOK teachers, both civil servants and non-civil servants through online meetings using the virtual zoom meeting platform. With the implementation of this thematic PPM activity, it is hoped that it will increase the knowledge, understanding and ability of PJOK teachers at the SMP/Equivalent level in writing and publishing scientific articles/works. In addition, it is also to establish family relationships and friendships between PJOK teachers, PJOK MGMP for junior high school/equivalent levels, especially in the Kulon Progo Regency, Yogyakarta with the thematic PPM team, seminar/workshop presenters and FIK UNY institutions in particular. This activity provides many benefits for PJOK teachers, especially providing knowledge and understanding of the ethics of writing and publishing scientific papers with the theme of physical education, sports and health that can be used for self-promotion and assessment of promotions or positions jobs.
