KARAKTER RELIGIUS MAHASISWA MUSLIM UNIVERSITAS NEGERI YOGYAKARTA

by Drs.Suparlan,M.Pd.I

ABSTRACT

Abstract
This research aims to: 1.Describe the religiosity of UNY students before and after participating in PAI learning. 2. Knowing the effectiveness of online PAI learning at UNY in fostering student religiosity.
This ex post facto research subjects were students in semester 1 of the 2022/2023 academic year who took PAI courses, the sample was determined by random sampling. This research uses a questionnaire scale adapted from research by Mami Hajaroh et al (2021). Test the reliability of the instrument in the research using the Alpha Cronbach method and test effectiveness using the Paired T Test, with the help of SPSS 26.0 for windows
The results of the research show that the religiosity of students before taking part in the quality of student religiosity from all aspects was in the majority very high (81.4%), and only in the intellectual aspect it was still very low (0.2%) and low (8.0%). Religiosity after participating in PAI learning, the quality of students' religiosity from all aspects is already very high in the majority (84.2%), and only in the intellectual aspect is it still very low (0.1%) and low (1.0%). The results of the t test with a paired sample test show that student religiosity has increased, as evidenced by a significance of 0.000 (p value < 0.05), so Ho is rejected. This means that there is a significant difference in religiosity before and after PAI learning.
