

Classroom Action Research Implementation in SMK DIPONEGORO DEPOK

by Wardan Suyanto, Agus Budiman, Lilik Chaerul Yuswono, Sukoco

ABSTRACT

The activity in SMK Diponegoro was to allow the teacher of this school to conduct classroom action research (CAR) guided by the team from Universitas Negeri Yogyakarta. The team coached the teacher to write proposal, plan to the implement CAR, implementation in the classroom, conduct seminar of the study result, and writing research report.

At the end of the community service only 75 % of the participant can finish all the CAR completely. Generally the teacher had difficulties in finding problem that could be overcome by CAR, simply because they feel no problem in their class.
