ABSTRACT

The purpose of PPM activities is to motivate partners who have spare time and ability to do business, but lack the motivation to start a business; Provide training to improve Partners' skills and knowledge about anti-acne soap with quercitrin nanoemulsion additive; Provide training to improve Partner skills in making attractive product packaging; and to Improve Partner Skills in marketing. The method used in PPM activities is to provide training and assistance in making soap, making attractive packaging, and good marketing techniques. PKM activities that have been carried out in Soropadan Village have succeeded in increasing the knowledge and insight of residents about the introduction of parasitic plants and quercitrin compounds that can be developed in the form of quercitrin nanoemulsion, as well as its health benefits. Participants come up with ideas for entrepreneurship to take advantage of spare time in between being busy as a housewife.
