ABSTRACT

Learning during the pandemic forces parents to have skills in using technology. Through the use of digital technology, parents of students get various conveniences in obtaining teaching materials. Students can carry out learning at the same time using groups on social media such as the Zoom application, Google Classroom, or the Quizizz application as a medium for student evaluation learning. Several housewives in Gumblegan village, who mostly accompany children to study at the elementary school level, show that they do not have the skills to take advantage of the learning features implemented in schools. The purpose of this activity is to provide knowledge for housewives regarding the use of online learning features in accompanying children while studying at home. The activities carried out consist of training and mentoring using lecture, demonstration, monitoring methods. The training resulted in four findings. First, PPM activities can run well and smoothly and participants' assessment of the implementation of PPM is also very good. Second, the participants experienced an increase in their skills in using online learning features. Third, the motivation and enthusiasm for participating in the training was very high because the responses given by the participants were very active during the training and mentoring process. Fourth, the service participants feel happy and satisfied with this service activity and hope that similar activities can continue to be carried out in the future
