### **ABSTRACT**

Poverty is the abstract social and economic phenomena which very complex and is in various societies. Poverty is not something that stands alone, but would be a reality as a result powerlessness interaction between various aspects of which is in human life, especially social aspects and the economic aspect and the aspect of behavior and associated with the company authorized capital held by the poor meanwhile empowerment can be whatever was done in based charity and zakat which having the function of social realize the manifestation of justice. Zakat is aims to empowerment community approach to internalised the purpose of alms for changes in the condition of the poor. Not only of worship such amaliyah zakat, it is also used to change can be realized the condition of the poor so as to have power to try and self service so that it can be to raise the income of which result in improving the welfare of material and immaterial.

The research is the study explanatory performed by using the quantitative methods with the approach of SEM ( structural equation model ). A member of a small sample was determined with a method of non-probability sampling of in particular with purposive sampling method. The results of the study find of empowerment of the program it has some positive effects and significantly correlates with the attitude to moving out of poverty, the level of independency of mustahiq have a relatively low. While if the program is viewed from a direct influence this partial, empowerment processes of mustahiq is the main factor in determining to the establishment of the the attitude to moving out of poverty.
