ABSTRACT

Achievement is the ultimate goal of Indonesian sports development and construction. The achievements achieved by the Indonesian national team and football clubs in regional and international events in the last 20 years can be said to be of concern. Systems and patterns of young age coaching management are the root of all problems. The young-age coaching system whose main executor is the high-quality SSB (soccer school) is far from the development process of a qualified young player. This research aims to compile quality documents (Quality management System) of SSB management at IKA SSB members of the DIY Provincial Association. The research method used is the method of R and D (Research, Development). The research on RG scheme year 2019 produces the draft document model of SSB management system in the province of DIY to the stage is ready to be tested in the field. The draft model of SSB Management in the province of DIY based quality management system has undergone changes, improvements as advised by expert validators. Draft SSB management model in the province of DIY region based on quality management system after having a validity test has an average score of 0.87 which means the draft is eligible for subsequent testing.
