

## **MOTOR SKILLS STUDENTS PGSD FIK UNY SM III FORCE 2014**

**by Sudardiyono**

### **ABSTRACT**

Based on observations made during his lectures in previous semesters, students PGSD SM III FIK UNY force in 2014 remained generally doing college schedule as determined by the agency or of the faculty member teaching. Lectures are conducted frequently experience problems when professors experienced the same workload, so that lecturers can not do the course but the students just do not want to use the opportunity to do their own, and the fact it will greatly affect the student motor. Motor condition is very useful to maintain a wide range of motion and maintain physical condition in order to resolve the appearance of lectures in the next semester is not declining physical condition. The background of the fact that has been pointed out, the researchers want to do research with the title "Student of Motor Ability PGSD Penjas SM III FIK UNY force in 2014".
