

BEST PRACTICE REGARDING QUALITY ASSURANCE SYSTEM GOVERNANCE

by Mutiara Nugraheni dkk

ABSTRACT

Quality higher education is essentially an effort to grow develop human potential in accordance with society's values ??and culture. Quality education is a pillar in building a strong, advanced and dignified nation. Quality education will definitely be produce quality graduates. Efforts towards quality education carried out by the government by improving regulations to encourage universities to create a culture of quality as an effort to improve quality of higher education nationally. One of them is pushing strengthening the Internal Quality Assurance System (SPMI) at each university from high to study programs and the smallest units. Quality assurance Education is a series of interrelated processes and systems for collect, analyze, and report data on performance and quality educators and educational staff in educational institutions. Underwriting process quality identifies aspects of achievement and priorities for improvement, provision data as a basis for planning and decision making and to help building a culture of continuous quality improvement. Effort to get Complete external recognition (SPME) must be supported by strengthening the culture of SPMI implementation at the faculty or study program level Yogyakarta State University, so sharing is needed between study programs related to the implementation of SPMI which is packaged in the form of governance training quality assurance system. The expected result is uniformity Steps in implementing SPMI as a culture of quality assurance for study programs and Faculty
