

TEACHER PERFORMANCE IN DEVELOPING INSTRUMENTS FOR ASSESSING STUDENT LEARNING OUTCOMES IN PHYSICAL EDUCATION IN THE SPECIAL REGION OF YOGYAKARTA

by Guntur, Wawan Sundawan Suherman, Sigit Nugroho, Yudanto, dan Nur Sita Utami

ABSTRACT

This study aims to determine teacher performance in developing evaluation tools for physical education learning outcomes—a survey on the ability to formulate research planning and implementation. The study population consisted of 38 high school physical education teachers, 12 junior high school physical education teachers, and 33 elementary school physical education teachers in the Special Region of Yogyakarta. This study uses a quantitative approach. The results of the teacher's performance in preparing the instrument for assessing student learning outcomes in physical education in the Special Region of Yogyakarta are in a good category.
