

TRACER STUDY SURVEY ON PHYSICAL EDUCATION HEALTH AND RECREATION STUDY PROGRAM 2020

by Ahmad Rithaudin, Nurhadi Santoso, Subagyo, Sri Mawarti, F. Suharjana

ABSTRACT

The purpose of this research is to find out: 1) a complete picture of the job search for graduates, 2). How long has the alumni been in employment, and 3). Get input on the relevance of learning experiences to the world of work.

This research is a descriptive study using a survey method. The subjects of this study were alumni of the PJKR study program who graduated in 2013-2018. The instruments used for this study were: through an online questionnaire system. The use of online questionnaires is considered to have advantages, including more cost savings (no need to print and send by post), does not require a lot of staff in its distribution (data is entered by respondents into the system themselves), output results will be faster (data collected in the system). so that processing is done faster), and it is likely that more respondents will be netted Analysis of the data used in this study using descriptive analysis techniques that can describe how long alumni get a job, the relevance of the study program with the field of work.

Based on the results of the research and discussion that has been presented in the previous discussion, it can be concluded that several things are related to this research, namely; tracers have been identified for alumni of the PJKR study program from 2013-2018 with a total of 222 alumni. In addition, it can also be concluded that there is a relevance between the existing curriculum in the PJKR study program with alumni competencies which include components of knowledge, attitudes and skills.
