

Workshop on Utilizing Used Goods for Making Educational Game Tools as long as children study at home

by Muthmainah, Nur Hayati, Rina Wulandari

ABSTRACT

This PPM activity aims to improve the knowledge and skills of PAUD teachers in Kecamatan Trimulyo Jetis Bantul in utilizing used goods for the manufacture of APE. APE is developed from used materials such as used bottles, used boxes, and other objects at home.

The methods used in this activity are lectures and workshops. The workshop was carried out by involving 30 PAUD teachers, both family planning and kindergarten teachers in the Jetis District, Bantul. The meeting session was divided into four sessions, namely 3 material delivery sessions and 1 practice session. In this activity, assistance is also carried out so that the APE products produced are more optimal.

The implementation of the first session was filled with a lecture entitled "Development of Educational Game Tools in PAUD". The second session was filled with a lecture entitled "Utilization of Used Materials for Making APE", and the third session was filled with workshops on making APE from used materials. The participants were divided into 10 groups, where one group was given the task of practicing 5 APEs. The activity began with a demonstration of making an APE and then immediately put it into practice. In this activity, students were involved by the PPM team in assisting the practice. The materials have been provided by the PPM team, so that the participants focus on the workshop activities and can develop creations according to their respective ideas. The APE that has been made is brought home by the participants so that it can be used as a learning medium for children in class. Participants seemed enthusiastic in making APE from used materials, and were able to develop their own creative ideas.
