ABSTRACT

Training of Curriculum 2013 Learning Tool Development in “SMK Perindustrian Yogyakarta”

Abstract .

The Community Service Program (PPM) is a training and assistance program in the context of developing learning tools based on the revised edition of the 2013 SMK curriculum, specifically the learning evaluation tool. This activity was carried out at the Yogyakarta Industrial Vocational School on July 1 and 2, 2019. The PPM activity aims to help teachers at the Industry Vocational School to better understand and be skilled in developing learning devices especially evaluation tools which will be implemented in learning.

The strategy for the implementation of the activity is carried out by providing material through training and practice in making learning tools through workshops for approximately 16 hours carried out for 2 days, plus assignments for approximately 2 weeks to compile the learning tools. The description of PPM activities includes opening, presentation from school supervisors, exposure from practitioners in the business / industrial world, core exposure on the revised edition of the 2013 curriculum by the PPM team, workshops making learning tools especially evaluation tools, and closing. Completion of the equipment is given 2 weeks as a form of assignment.

The result of this program is the implementation of training and workshops for the development of learning tools based on the 2013 Revised Curriculum to help teachers who experience difficulties in preparing learning tools, especially in learning evaluation tools. In addition, the workshop product is a complete learning tool in accordance with the rules in the revised edition of the 2013 curriculum specifically the learning evaluation tool. As an additional output, there is a partnership MoU between Yogyakarta Industrial Vocational School and FT UNY.
