

TRAINING FOR THE DEVELOPMENT OF COMPETENCY TEST MATERIALS OF BRAKING SYSTEM MAINTENANCE AND REPAIRMENT FOR ASSESSORS IN YOGYAKARTA PROVINCE

by Martubi, Ibnu Siswanto, Agus Puji Prasetyono

ABSTRACT

LSP OTOINA is an institution that provides Competency Test services in the automotive sector which has 16 assessors. Recently, LSP OTOINA does not yet have a competency test material document of braking system maintenance and repairment for four-wheeled light vehicles in accordance with the Decree of the Minister of Workforce Number 97 of 2018. Therefore, the community service program (PkM) for the lecturer group of the automotive engineering education department of FT UNY aims to provide training on the development of competency test material for the "Braking System Maintenance and Repairment" cluster scheme for assessors of LSP OTOINA. Activities are carried out through the stages of planning, implementing training, and evaluating. The resulting output is the existence of a Cooperation Implementation Plan between PT. FT UNY Automotive with LSP OTOINA, competency test material documents for maintenance and repair of four-wheel light vehicle brake systems, and satisfaction from training participants.
