

TRAINING ON ANALYSIS WITH THE “TAP” SOFTWARE AS STRENGTHENING PROFESSIONALISM OF PHYSICAL EDUCATION TEACHERS OF YOGYAKARTA ELEMENTARY SCHOOL

by Subagyo, Hari Yulianto, Hedi Ardianto Hermawan

ABSTRACT

This Community Service activity with the title of Question Analysis Training with the Help of TAP Software as Strengthening Professionalism of Physical Education Teachers in Yogyakarta City Elementary Schools aims to; (1) Providing training to physical education teachers at Yogyakarta City Elementary Schools on Analysis of Question Items by using TAP Software, (2) Encouraging Yogyakarta City Elementary School physical education teachers to improve their professional competence by utilizing technology that continues to develop. This community service has a target of elementary school physical education teachers in the city of Yogyakarta. The total target was 25 participants from various sub-districts in the Yogyakarta City area according to the recommendations of the Yogyakarta City Teacher Working Group (KKG PJOK). This service activity is in the form of training with materials consisting of; 1) Introduction of material on the preparation of good questions, 2) Introduction to TAP software, 3) Practice analysis of item analysis with the help of TAP software by participants. The implementation of the training received a positive response from the management of the KKG PJOK SD Yogyakarta City and also the teachers as the participants involved. The training participants thought that the training activities could provide new knowledge and experience to physical education teachers in terms of preparing questions. Participants enthusiastically participated in a series of training events. The item analysis training activity with the help of TAP software is expected to strengthen the professionalism of physical education teachers at Yogyakarta City Elementary Schools.
