ABSTRACT

Good facilities are those that meet the needs of the community or users, provide a positive experience, and pay attention to their comfort and safety. Providing good sports facilities is very important to support physical activity and public health. Outbound facilities usually include a variety of equipment and facilities for outdoor activities involving teams, such as group games, physical challenges, and other activities.

A workshop is an activity or meeting that is usually carried out in a controlled environment, with the aim of learning, practicing or developing certain skills in a particular field by collaborating with the people of Kampung Emas Krapyak Seyegan as partners to develop a sports facility management workshop.

Community Service (PkM) regarding sports facilities workshops held offline on 1 and 2 July 2023 in Kampung Emas Krapyak Seyegan seems to be a very valuable initiative. This workshop was an opportunity to introduce theory and practice regarding sports facilities to the 30 participants who attended
