## **ABSTRACT**

The aim of this community service activity is a). raise awareness about the dangers of violence against children, b). prevent acts of violence against children in the family environment and Islamic boarding school environment, c). foster knowledge of child protection and children's rights, and d). to carry out cooperation in providing assistance carried out by community institutions/Islamic boarding school administrators.

This community service activity is carried out using lecture, question and answer, discussion methods and uncovering problems related to violence committed by children and solving these problems. The PPM target is 40 students at the Darul Ulum Islamic boarding school. This PPM will be implemented on Thursday, July 13 2023, in the Darul Ulum Islamic Boarding School Hall. Activities in the first session were filled with presentation of material about the phenomenon of violence against children in terms of its occurrence, prevention and ways of overcoming it, understanding and preventing violence committed by children, then assistance to teachers if violence against children occurs in the Islamic boarding school environment. The material was presented using the lecture and question and answer method. In the second session, students were given the task of identifying cases and then continuing with discussions, so that the participants had the ability to solve problems related to the phenomenon of violence against children and how to deal with violence committed by children and the Child Protection Law among Students. The second material is presented using the method of discussion and problem solving to solve the case.

This service activity can be said to be carried out well and smoothly, but there are still several limitations in its implementation. The students as socialization participants were very enthusiastic and eager to take part in the sessions, including material presentation, question and answer and discussion activities. Apart from that, the results of the participants' presentation and discussion of the simulated cases showed an increase in the participants' level of knowledge and understanding of this material.

*Kata Kunci: prevention of acts of violence against children*
