

EXPLORING THE CONSTRUCT OF MEANING IN LIVE AMONG THE LAST UNDERGRADUATES

by Farida Agus Setiawati

ABSTRACT

Meaning in life is a fundamental aspect of the human behavior that has important role in developing behavior. The concept of the meaning in life studied continuing by several experts from various theories and different subjects. This research studied the constructs of meaning of life in final semester students. The final semester students are chosen, considering the weight of development tasks that must be finished during this period. By using the mix method approach, there are seven factors in the construct of the meaning in life among the last undergraduates school, they are ability to: 1) face difficult and difficult situations, 2) solve problems faced, 3) adjust to new situations, 4) rise from failure, 5) readiness to deal with unpleasant situations, 6) feel positive affect behind seemingly unpleasant situations, and 7) benefit from unpleasant events.
