

Training on Compilation of Classroom Action Research Proposals and Writing of Scientific Articles for Kindergarten Teachers in the 5th Group of Balecatur Gamping Sleman

by Arif Marwanto, Bambang SHP, Yatin Ngadiyono, Putut Hargiyarto, Setya Hadi, Jarwo Puspito

ABSTRACT

The purpose of this activity is to provide knowledge to participants with Classroom Action Research and Scientific Article Writing material. It is expected that all participants will be able to apply CAR in learning in schools and be able to compile scientific articles from the CAR.

The method of activity used is to use lecture, discussion, simulation, direct practice or assignment methods, and presentations, so that the material presented will be more easily understood by participants.

The results of this activity are: (1) the number of participants is 30 kindergarten teachers; (2) the initial ability of kindergarten teachers before attending training, still lay or do not understand about CAR and writing scientific papers. Specifically in designing and determining actions to be implemented; (3) the ability of participants after participating in training activities is that all participants (100%) have understood the material delivered and are able to apply it to the learning process in their respective schools.
